

“ I have a great new technology. I need help commercializing it. ”

“ We have maximized our opportunity in our current markets. Where else can we go? ”

TDMI is a market research process designed specifically for technology-based assets.

TDMI helps you understand:

- whether investing resources in a product idea or market diversification opportunity is worthwhile
- which markets and applications are most promising
- what steps to take to exploit market opportunities

TDMI explores your idea, product or capability and determines:

- strengths and weaknesses
- potential applications
- trends and drivers that define the opportunity
- potential partners and customers, and potential competitors
- value and size of potential markets
- potential risks

WHEN SHOULD I CONSIDER A TDMI?

		Market	
		Existing	New
Asset	New	✓	✓
	Existing		✓

Technology-Driven Market Intelligence

Value of TDMI to Your Business:

Specific – highly focused on your needs

Systematic – proven process and methods

Comprehensive – broad perspective and thorough

Conducted by experienced technical and business experts with broad market knowledge and access to experts in many industries and technical disciplines.
