

Lean Together™ 2.0

With a focus on growing people, Lean Together 2.0 is for the advancement of continuous improvement, specifically geared to support 2 Second Lean initiatives. Each month, learn from a subject matter expert to build upon your company's efforts and tour regional manufacturing companies for examples of success.

Lean Together™ and 2 Second Lean™ - two elements blended with one goal in mind -
Continuous **I**mprovement with **e**xponential growth!

July-April, 2019 • 8:30-10:30

**Monthly sessions rotate among
classroom education *and* facility tours.**

Company Culture and Generational Diversity

Sustaining continuous improvement can be challenging, especially with varied communication styles, attitudes, and behaviors which influence company culture. Understanding and addressing generational traits will help company's achieve the best outcomes.

Respond Instead of React Using Critical Thinking Skills

Improving and using critical thinking strengthens people, processes, and productivity. Learn how our mind works, why we react instead of respond, and core critical thinking skills.

Improvement and Coaching Kata

Learn how to work as a team to develop and apply a pattern of scientific thinking to a goal or challenge.

Lean Performance Measurement (Key Performance Indicators)

You cannot manage or improve what you don't measure. Gain assistance to create and implement an effective lean performance measurement system geared toward driving improvement behaviors.

Coaching

Learn the difference between leading, supervising, and coaching. Through interactive exercises, you will identify which one is happening the most in your business and learn an effective process for coaching that can be duplicated throughout your leadership team.

nw IRC
